

Quality Management

The core principle of Passavant Energy & Environment is to maintain world-class service with German standards. The fully integrated Management System certified to **DIN EN ISO 9001, 14001 and 45001** ensures that the relevant requirements for quality are recognized for all projects until the completion of work in terms of Planning, Manufacture, Delivery and Operation of products and plants for waste water purification, treatment of potable water and municipal solid waste and refurbishment of hydro power plants.

All our activities are performed in a planned and systematic manner under procedural control to ensure that all projects are progressively controlled / assured until completion of the work.

All personnel working within the Company are responsible for the quality of their work and perform their duties in accordance with the requirements of the manual and the referenced procedures.
